

INSTRUCTIONS TO AUTHORS

Manuscript should be typed in 'Times New Roman' font with ample margins, one and half spaced and in double column (except the portion containing the title, authors' names and addresses, abstract, and key words), and mailed to the Editor at editorjbsb@gmail.com in the following formats : for text Microsoft Word, for tables Excel format, and for figures JPG or TIF format in separate files.

The title of papers should explain authors' objectives. Papers should be written in lucid English and must contain relevant information to explain results, and are subdivided as follows : i) Abstract, ii) Key words, iii) Introduction, iv) Material and Method, v) Results, vi) Discussion, vii) Acknowledgement, if any, viii) References. In case of descriptive articles other subdivisions may be permitted. In short communication there is no abstract.

The number of illustrations and tables should be kept to a minimum. Photographs may be minimized to fit one column. If there is more than one photograph in a plate, these should be clear and of same intensity. If necessary, hand-drawing with India ink, on a Bristol board should be made. Appropriate position of tables and figures should be indicated in the hard copies. A current issue of the journal or the World List of the Scientific Periodicals may be consulted for this purpose.

Plant names must conform to the International Code of Botanical Nomenclature, and be in italics, when a name is first cited, the complete scientific name with author citation is desirable. Later, genus initial may be used followed by species name.

Abbreviations should be used sparingly. Standard chemical symbols are accepted. However, when an abbreviation is first used the full term should be mentioned with the abbreviation within parentheses.

In calculating the degree of reduction of the figures, authors should keep in mind the column-size (7.5 cm) as well the page-size (16.25 cm x 20 cm) of the journal. Tables and figures should be numbered in Arabic and submitted in separate sheets. Tables concerning experiments should have brief legends containing description of the experiments so that data are intelligible to the readers. Legends of figures should also be submitted in a separate sheet.

Citations in the text should be as follows : Sharma and Sharma (1994); 'a', 'b', 'c' etc. to distinguish between papers of same author(s) published in the same year and cited in the text. Sample citations are given below:
